## Assignment 1 : YOU CANT DIVIDE US.

**1**

Create a .html document with a .js and .css file. Download two small .jpeg images from google.
All the diffirent files should be seperate folders.
  the css should be inside a folder named "css".
  the javascript should be inside a folder named "scripts".
  the 1 image should be inside a folder named "pictures".
  the html file is called "index" and are outside.

**2**

The html file have the .js & css file linked and should display:
  1 small image *(400 px in width & 300px height).*
  1 text under the image that suits it *(use the <p> tag).*
  2 input tags were you only can write numbers.
  1 button with "divide" displayed on the it.

> Inject the button with javascript that displays "divide" on the console when you click the button;

*Optional*

**3**

Javascript file should contain 2 variables called "**foo**" & "**bar**".
  **foo** & **bar** should both have the number 0 assigned to them.
  The script will perform a division of these variables and show it on the browsers console log.

> Make a if statement that alerts with "**You cant divide us!**" if the results doesn't produce a number.

*Optional*

Send everything to alrik.he@gritacademy.se  as an compressed file *(.zip .rar .7z).*
*Before the 2021-08-04 , thursday 17:00.*
